Technical Findings & Evidence Registry

MEDIUM

OBSERVED

SEO

E-011

Improper H1 Heading Structure (0 missing, 1 multiple H1s)

Observation: 0 page(s) have no <h1> tag, and 1 page(s) have multiple <h1> tags.

Evidence: Inspected 2 pages. Heading hierarchy should feature exactly one main H1 per page followed by logical H2s and H3s.

Impact: Impairs search engine understanding of the page topic and causes screen readers confusion for accessible navigation.

Recommendation: Ensure every page contains exactly one unique, descriptive <h1> tag at the top of the content structure.

HIGH

OBSERVED

SEO

E-012

Images Missing Alt Text (9/56 images)

Observation: 9 images on the website lack descriptive alt attributes.

Evidence: Found across crawled pages. Sample missing alt images detected in DOM.

Impact: Prevents image search indexing in Google Images and makes visual content inaccessible to visually impaired users using screen readers.

Recommendation: Add concise, descriptive alt text to all meaningful images. Use empty alt="" for purely decorative background elements.

HIGH

OBSERVED

ACCESSIBILITY

E-013

Images Missing Accessible Alt Text (9 detected)

Observation: 9 image elements do not provide textual alternatives via alt attributes.

Evidence: Found across 2 crawled pages.

Impact: Assistive technology users (such as screen readers) cannot perceive the meaning or context of graphical content.

Recommendation: Add meaningful alt attributes describing the content or function of each image.

HIGH

OBSERVED

LOCAL_SEO

E-019

Target Location (Global / San Francisco) Missing from Primary SEO Elements

Observation: The specified target geography "Global / San Francisco" was not prominently detected in page titles, meta descriptions, or main headings.

Evidence: Crawled 2 pages. Checked <title>, <meta description>, and <h1> tags against location "Global / San Francisco".

Impact: Reduces visibility in localized search queries, Google Maps / Local Pack results, and nearby customer discovery.

Recommendation: Incorporate "Global / San Francisco" naturally into the homepage title tag, H1 heading, service area sections, and footer contact block.

MEDIUM

INFERRED

VISUAL

E-002, E-006, E-015

Visual Hierarchy & Focal Point Modernization

Observation: Above-the-fold layout could benefit from stronger headline typography contrast, clear primary call-to-action prominence, and elevated modern spacing tokens.

Evidence: Evaluated 2 crawled templates. Visual inspection of hero and body sections indicates opportunity for enhanced visual contrast and modern design tokens.

Impact: Modern, high-contrast visual design builds instant visitor trust and dramatically improves engagement time on landing.

Recommendation: Implement a refined typographic hierarchy (48px+ H1 hero, 20px lead paragraph), distinct high-contrast CTA button styling, and consistent 64px+ section spacing.

HIGH

INFERRED

CONVERSION

E-018

Lead Capture & Instant Engagement Opportunity

Observation: The website lacks instant real-time conversion channels such as floating WhatsApp buttons or frictionless 2-field lead capture forms.

Evidence: Inspected conversion triggers across 2 pages. Direct WhatsApp messaging links or streamlined quote forms were not detected in the primary navigation or sticky footer.

Impact: Up to 60% of modern mobile visitors prefer instant chat or 1-click quote requests over navigating to a separate contact page.

Recommendation: Add a persistent floating WhatsApp contact widget and an above-the-fold "Get Instant Quote" trigger.
