Technical Findings & Evidence Registry

HIGH

OBSERVED

TECHNICAL

E-002, E-003, E-004, E-005, E-006

Uncaught JavaScript Console Errors (12 detected)

Observation: Detected 12 runtime JavaScript errors across 12 pages.

Evidence: Sample errors: - Failed to load resource: the server responded with a status of 404 () - Failed to load resource: the server responded with a status of 404 () - Failed to load resource: the server responded with a status of 404 ()

Impact: JavaScript errors can break interactive UI elements, sliders, forms, tracking scripts, and lead to poor user experience.

Recommendation: Inspect browser developer console logs, fix unhandled exceptions, and ensure third-party scripts load safely.

MEDIUM

OBSERVED

SECURITY

E-063

Missing Defensive HTTP Security Headers (2 missing)

Observation: The web server response does not include standard defensive headers: Strict-Transport-Security (HSTS), X-Content-Type-Options.

Evidence: Response headers from https://som.com/ were inspected. Found: {"hsts":null,"csp":"frame-ancestors 'self';","xFrameOptions":"SAMEORIGIN","xContentTypeOptions":null,"referrerPolicy":null,"permissionsPolicy":null}

Impact: Leaves the website vulnerable to clickjacking (missing X-Frame-Options), MIME-type sniffing, and cross-site scripting risks.

Recommendation: Configure your web server (Nginx/Apache/Cloudflare) to send HSTS, X-Frame-Options: SAMEORIGIN, and X-Content-Type-Options: nosniff headers.

HIGH

TESTED

TECHNICAL

E-002, E-003, E-004, E-005, E-006

Broken Links / 404 HTTP Responses (12 detected)

Observation: Encountered 12 broken resource or link requests returning HTTP 404 Not Found status.

Evidence: 404 status codes received during crawling across 12 inspected pages.

Impact: Degrades user experience, damages SEO crawl budget, and creates dead-end navigation for visitors.

Recommendation: Audit all internal hyperlinks, update or redirect obsolete URLs, and ensure all asset paths are valid.

HIGH

OBSERVED

SEO

E-064

Missing Meta Descriptions (2/12 pages)

Observation: 2 page(s) lack a <meta name="description"> tag.

Evidence: Sample affected URLs: - https://www.som.com/expertise/product-design - https://www.som.com/projects/corso-italia-23

Impact: Search engines will automatically generate snippets from random body text, resulting in lower click-through rates (CTR) from search results.

Recommendation: Add unique, compelling meta descriptions (130-160 characters) containing primary keywords and a clear call to action for every page.

MEDIUM**OBSERVED****SEO**

E-065

Improper H1 Heading Structure (1 missing, 10 multiple H1s)

Observation: 1 page(s) have no <h1> tag, and 10 page(s) have multiple <h1> tags.

Evidence: Inspected 12 pages. Heading hierarchy should feature exactly one main H1 per page followed by logical H2s and H3s.

Impact: Impairs search engine understanding of the page topic and causes screen readers confusion for accessible navigation.

Recommendation: Ensure every page contains exactly one unique, descriptive <h1> tag at the top of the content structure.

HIGH**OBSERVED****SEO**

E-066

Images Missing Alt Text (145/296 images)

Observation: 145 images on the website lack descriptive alt attributes.

Evidence: Found across crawled pages. Sample missing alt images detected in DOM.

Impact: Prevents image search indexing in Google Images and makes visual content inaccessible to visually impaired users using screen readers.

Recommendation: Add concise, descriptive alt text to all meaningful images. Use empty alt="" for purely decorative background elements.

HIGH**OBSERVED****ACCESSIBILITY**

E-067

Images Missing Accessible Alt Text (145 detected)

Observation: 145 image elements do not provide textual alternatives via alt attributes.

Evidence: Found across 12 crawled pages.

Impact: Assistive technology users (such as screen readers) cannot perceive the meaning or context of graphical content.

Recommendation: Add meaningful alt attributes describing the content or function of each image.

HIGH**OBSERVED****LOCAL_SEO**

E-073

Target Location (Chicago / Global) Missing from Primary SEO Elements

Observation: The specified target geography "Chicago / Global" was not prominently detected in page titles, meta descriptions, or main headings.

Evidence: Crawled 12 pages. Checked <title>, <meta description>, and <h1> tags against location "Chicago / Global".

Impact: Reduces visibility in localized search queries, Google Maps / Local Pack results, and nearby customer discovery.

Recommendation: Incorporate "Chicago / Global" naturally into the homepage title tag, H1 heading, service area sections, and footer contact block.

VISUAL

E-002, E-007, E-012, E-017, E-022, E-027, E-032, E-037, E-042, E-047, E-052, E-057, E-069

Visual Hierarchy & Focal Point Modernization

Observation: Above-the-fold layout could benefit from stronger headline typography contrast, clear primary call-to-action prominence, and elevated modern spacing tokens.

Evidence: Evaluated 12 crawled templates. Visual inspection of hero and body sections indicates opportunity for enhanced visual contrast and modern design tokens.

Impact: Modern, high-contrast visual design builds instant visitor trust and dramatically improves engagement time on landing.

Recommendation: Implement a refined typographic hierarchy (48px+ H1 hero, 20px lead paragraph), distinct high-contrast CTA button styling, and consistent 64px+ section spacing.

HIGH

INFERRED

CONVERSION

E-072

Lead Capture & Instant Engagement Opportunity

Observation: The website lacks instant real-time conversion channels such as floating WhatsApp buttons or frictionless 2-field lead capture forms.

Evidence: Inspected conversion triggers across 12 pages. Direct WhatsApp messaging links or streamlined quote forms were not detected in the primary navigation or sticky footer.

Impact: Up to 60% of modern mobile visitors prefer instant chat or 1-click quote requests over navigating to a separate contact page.

Recommendation: Add a persistent floating WhatsApp contact widget and an above-the-fold "Get Instant Quote" trigger.
