# Technical Findings & Evidence Registry

MEDIUM

OBSERVED

SEO

E-011

### Improper H1 Heading Structure (0 missing, 1 multiple H1s)

**Observation:** 0 page(s) have no <h1> tag, and 1 page(s) have multiple <h1> tags.

**Evidence:** Inspected 2 pages. Heading hierarchy should feature exactly one main H1 per page followed by logical H2s and H3s.

**Impact:** Impairs search engine understanding of the page topic and causes screen readers confusion for accessible navigation.

**Recommendation:** Ensure every page contains exactly one unique, descriptive <h1> tag at the top of the content structure.

HIGH

OBSERVED

SEO

E-012

### Images Missing Alt Text (9/56 images)

**Observation:** 9 images on the website lack descriptive alt attributes.

**Evidence:** Found across crawled pages. Sample missing alt images detected in DOM.

**Impact:** Prevents image search indexing in Google Images and makes visual content inaccessible to visually impaired users using screen readers.

**Recommendation:** Add concise, descriptive alt text to all meaningful images. Use empty alt="" for purely decorative background elements.

HIGH

OBSERVED

ACCESSIBILITY

E-013

### Images Missing Accessible Alt Text (9 detected)

**Observation:** 9 image elements do not provide textual alternatives via alt attributes.

**Evidence:** Found across 2 crawled pages.

**Impact:** Assistive technology users (such as screen readers) cannot perceive the meaning or context of graphical content.

**Recommendation:** Add meaningful alt attributes describing the content or function of each image.

HIGH

OBSERVED

LOCAL\_SEO

E-019

### Target Location (Global / San Francisco) Missing from Primary SEO Elements

**Observation:** The specified target geography "Global / San Francisco" was not prominently detected in page titles, meta descriptions, or main headings.

**Evidence:** Crawled 2 pages. Checked <title>, <meta description>, and <h1> tags against location "Global / San Francisco".

**Impact:** Reduces visibility in localized search queries, Google Maps / Local Pack results, and nearby customer discovery.

**Recommendation:** Incorporate "Global / San Francisco" naturally into the homepage title tag, H1 heading, service area sections, and footer contact block.

MEDIUM

INFERRED

VISUAL

E-002, E-006, E-015

### Visual Hierarchy & Focal Point Modernization

**Observation:** Above-the-fold layout could benefit from stronger headline typography contrast, clear primary call-to-action prominence, and elevated modern spacing tokens.

**Evidence:** Evaluated 2 crawled templates. Visual inspection of hero and body sections indicates opportunity for enhanced visual contrast and modern design tokens.

**Impact:** Modern, high-contrast visual design builds instant visitor trust and dramatically improves engagement time on landing.

**Recommendation:** Implement a refined typographic hierarchy (48px+ H1 hero, 20px lead paragraph), distinct high-contrast CTA button styling, and consistent 64px+ section spacing.

HIGH

INFERRED

CONVERSION

E-018

### Lead Capture & Instant Engagement Opportunity

**Observation:** The website lacks instant real-time conversion channels such as floating WhatsApp buttons or frictionless 2-field lead capture forms.

**Evidence:** Inspected conversion triggers across 2 pages. Direct WhatsApp messaging links or streamlined quote forms were not detected in the primary navigation or sticky footer.

**Impact:** Up to 60% of modern mobile visitors prefer instant chat or 1-click quote requests over navigating to a separate contact page.

**Recommendation:** Add a persistent floating WhatsApp contact widget and an above-the-fold "Get Instant Quote" trigger.
