3. Define Primary Service Area in Search Metadata

HIGH

E-007

Current Observation: Target location was not provided, and current page metadata does not specify a primary geographic service area.

Business Impact: Adding explicit geographic context helps search engines match the website with relevant local client searches.

👉 **Recommended Action:** Define target service areas and incorporate them into the main page title, search description, and contact details.

4. Elevate Visual Presentation & Brand Proof

MEDIUM

E-002, E-011

Current Observation: A structured visual showcase of completed projects, service capabilities, and client testimonials is needed.

Business Impact: A clean, high-contrast visual design creates a polished first impression and reinforces professional credibility.

👉 **Recommended Action:** Deploy high-contrast headlines, clear primary consultation triggers, and structured visual cards to showcase craftsmanship.

5. Strengthen Page Heading Structure

MEDIUM

E-008

Current Observation: Page headings can be organized with clear H1 and H2 hierarchy to provide visitors and search algorithms with an orderly outline of core offerings.

Business Impact: Proper heading hierarchy improves content readability and helps search engines accurately index each service topic.
